IDENTIFIERS *State University of New York

ABSTRACT

Fall 1982 statistics on the geographic origins, or permanent residence, of students attending institutions of the State University of New York are presented. This second of two volumes presents reports that display credit course students by origin or origin grouping. Separate tables are presented for each New York State county. Data are also presented on: the permanent residence of students from outside of New York State reported by standard geographic regions; the percent distribution of all undergraduate and graduate credit course students in terms of institutional totals distributed across the four New York State planning regions, and region totals distributed across institutions; and the percent distribution of all first-time full-time undergraduate credit course students and transfer undergraduate students in terms of institutional totals distributed across the four planning regions. Enrollment trend data from 1959-1982 are provided by individual institution and institutional type regarding the percent of the institution's full-time students who come from the institution's area of location, who come from New York State but outside the area of the institution's location, who come from the United States but outside of New York State, and who come from a foreign country. PART VIII -- PUBLICATIONS LIST

Publications List 258

INTRODUCTION

This report presents the results of the annual survey of the geographic origins, or permanent residence, of students attending institutions of the State University of New York during the Fall 1982 term. The report includes all credit course students and all institutions of the State University system. The current report is being published in two volumes. The first volume presents three distinct types of summary which uses the individual institution (or institutional type) as the unit of analysis. The second volume is composed of reports which display credit course students by origin or origin grouping. The second volume also includes a table which shows the enrollment trends by campus between 1959 and 1982.

The student and institutional data elements which enter into this report are as follows:

A. Student Data Elements

1. Student level (undergraduate/graduate)
2. Student load (full-time/part-time)
3. Student history (first-time/transfer)
4. Permanent residence (for New York State residents, county of residence; for other United States residents State or Territory of residence; and for non-resident aliens, country of origin)

B. Institutional Data Elements

1. County of location (for Community Colleges, Sponsorship area; for institutions located in Bronx, Queens, Kings, New York and Richmond counties, the New York City area)
2. New York State Planning Region
3. Contiguous Counties (county of location plus the New York State counties immediately surrounding the county of location)

VOLUME I

Volume I is divided into two parts:

Part I - (Table 84/8) summarizes the distribution of all credit course students by load, level and residency and includes various relative distance measures for New York State residents. Some of the origin concepts used in this report are campus specific (e.g., contiguous counties) and as a result the actual size of the area as measured in square miles or total resident population may fluctuate dramatically from campus to campus. Despite this inter-campus variability, the intent is to provide some measure of the enrollment impact of the "local" student population.

(Table 84/9) which follows, displays the origins of new (first-time and transfer) undergraduate students. The origin concepts parallel the preceding table. A detailed listing of the New York counties and regions used on this and the following report (table 84/9) can be found in Appendix A.

Part II - (Tables 84/10 through 84/121) displays each institutions enrollment by level, load, history and permanent residence. In addition, Part II contains various tables which summarize the total State University system as well as the institutions by type.

VOLUME II

Volume II is comprised of seven parts; Parts I through VI contain data for the Fall 1982 term, Part VII contains trend data.

Part I - (Tables 84/142 through 84/204) contains separate tables for each New York State county.

Part II - (Tables 84/205 through 84/214, 84/423 84/254, and 84/255) display the permanent residence of students from outside of New York State broken out by standard geographic regions. (i.e., Rest of US, Africa, etc.)

Part III - (Tables 84/229 through 84/238) display the percent distribution of all undergraduate credit course students in terms of institutional totals distributed across the four New York State Planning Regions and Region totals distributed across institutions.

Part IV - (Tables 84/256 through 84/260 and 84/418 through 84/422) display the percent distribution of all graduate credit course students in terms of institutional totals distributed across the four New York State Planning Regions and Region totals distributed across institutions.

Part V - (Tables 84/239 through 84/248) contain the percent distribution of all first-time full-time undergraduate credit course students in terms of institutional totals distributed across the four New York State Planning Regions and Region totals distributed across institutions.

Part VI - (Tables 84/249 through 84/252) report the percent distribution of transfer undergraduate students in terms of institutional totals distributed across the four New York State Planning Regions.

Part VII - (Table 84/253) contains a trend from 1959 through 1982. Data is provided by individual institution and institutional type regarding the percent of the institution's full-time students who come from the institution's area of location, who come from New York State but outside the area of the institution's location, who come from the United States but outside of New York State, and who come from a foreign country.

Previously, the geographic origins report was published in a very different format. The most apparent changes have occurred as a result of integrating first-time and transfer students into the tables which previously displayed only the full and part-time undergraduate and graduate populations. This expanded coverage allows us to offer a greater level of detail for new undergraduates and it provides our audience with easier access to the complete record of an institution or institutional type. In addition to the format changes, we have added a number of reports which were not previously published by our office. Some of the more important additions have been the inclusion of Table 84/9 which displays the distribution of new undergraduates by county of location and other measures of distance from campus. Substantial changes have also been made to the reports which show the distribution and attendance patterns of SUNY students from the four New York State Planning Areas. Prior to this year, this report was only available for first-time full-time undergraduates but this has been expanded to include all undergraduate, graduate and transfer students.

Up to this point, the geographic origins report were a massive undertaking because the aggregation, formatting and typing were all done manually. Fortunately, this is no longer required. A geographic origins reporting system has been implemented on the APL timesharing system at SUNY Binghamton. This system provides our office with a much faster and easier method of generating these reports and it also allows us the opportunity to include concepts which would have been difficult, if not impossible, to generate by hand.

Most surveys of the residences of college students suffer the problem of a valid definition of "residence". In this study, the respondents were asked to report "permanent" residence as distinct from "local" or "temporary" residence. As students grow older, marry, and participate in the community while attending an institution of higher education, there is an increasing tendency for the institution's records to begin to reflect the "local" residence in decisions regarding housing, tuition rates and the like. For example, the concept of "origin" for a student working on his third degree at as many colleges is not simply determined. It may be that the assumption of a single origin is a methodological flaw of all such surveys. However, the direction of bias caused by this problem can probably be stated as follows: somewhat more students have "origins" outside an institution's commuting distance than the data reflect. In order to collect uniform and consistent data, permanent residence was defined in accordance with a memorandum from the Counsel's Office on the "Establishment of Residence for Tuition Purposes".

The data included in this report provide the opportunity for all segments of the State University to obtain an accurate picture of the major areas they serve as shown by the geographic origins of their students. In view of expected changes in the pool of available students and resultant changes in enrollment patterns, the data in this report should provide an important instrument for institutional planning.

As is always the case, the significance of data depends on the network of interests, goals and priorities of the user of the data. Consequently, the data included in this report have been presented in a fashion designed to provide maximum flexibility, and hence utility, to a wide spectrum of users.

No study of this magnitude could have been conducted or completed without the extensive cooperation of many individuals. We would like to express our appreciation to those individuals on the campuses who are responsible for providing this office with data. Our gratitude is also extended to this office's statistical staff who were responsible for editing and verifying the data; and the typing and secretarial staff who were responsible for the typing tasks associated with the report and arranging for proper distribution of the publication.

FOOTNOTES

[a] Original constituent institutions of the State University of New York at its establishment in 1948.

[b] Date of establishment as a state college or institution.

[c] Date of incorporation into State University of New York.

[d] As of July 1, 1975, New York City Community College and the other community colleges (not shown here) sponsored by the New York City Board of Higher Education were no longer a part of the State University of New York.

NOTE: Dates preceding date indicated for establishment as a state college or institution refer to institutional antecedents of the present college or university. These may have been private institutions or controlled by a governmental entity other than the state. Intermediate institutional developments such as other college affiliation or date of first baccalaureate program offering have been omitted for the sake of brevity.

*The Health Sciences Centers at Buffalo and Stony Brook are shown separately here from their respective core campuses.
